

Walker AirSep 3[®]

Remove algae and water at its source.....your fuel tank.

- Purifies your diesel fuel underway or at the dock.
- Helps keep fuel filters from clogging and extends filter life.
- Helps protect against fuel-related shutdowns.
- Completely self-contained.
- Installs easily on bulkhead.
- Ideal for yachts 38ft. & up.
- 12 or 24-volt models.

Our New Dynamic Fuel/Water Separator™ is a product quality boat builders and yacht owners will demand alike. The new ALGAESEP 3 uses advanced technology that until now, was found only on very expensive systems. This breakthrough design allows fuel to be polished onboard, without leaving the dock.

Unit may be specified with Walker FuelSep, permanent fuel treatment device to further improve fuel quality and retard tank algae growth. Contact us to learn about this affordable system today.
